IMPORT & EXPORT

25 Years of best Global Engineering technology

Since 1994, we have been the leading importers, exporters and providers of reputed machinery brands of quality CNC, Conventional machine tools and fabricating equipments across the globe, supported by trained professionals and excellent infrastructure. We have the largest network of buyers and sellers across the world by virtue of our trained professional team. The prices we quote are always very fair and our commercial dealings are very transparent. We share our updated knowledge of CNC machines with our customers to help them in selecting the machines. Currently, we have a strong base of more than 5000 satisfied customers, built around with trusted and reputed 1000 plus dealers across the globe. Our after sales service is one of the most significant aspects of organisation earning a strong reputation as a leading international registered metal machinery provider. Our customer feedback on our service has always been excellent

Engineering growth & Success

Mr. Manikhumar Gopalakrishna

Founder, Managing Director

Mr. Manikhumar Gopalakrishna is the Founder of Seema Engineers & Managing Director of Seematec Machinery Impex Pvt. Ltd., He holds prominent positions and memberships in machinery & dealers associations across the globe. He is also on the consulting board of many companies in the field of engineering infrastructure development. With the experience gained from Taraus Group of companies, he started Seema Engineers in 1994 to exhibit his entrepreneur qualities.

He ventured into machinery dealing initially liaisoning of small machines and gradually moving to large machineries. His association with Mr. Raman, a reputed international machinery dealer got him the international machinery dealerships. This was only the beginning of a new era, which laid the foundation of Seema Engineers as Global machinery dealer. Due to his vision and foresightedness, he moved from small machinery dealership to heavy engineering projects. He has travelled to more than 22 countries for procurement of machinery. Seema Engineers, under his leadership has executed several international standard projects in heavy engineering for many MNCs. Mr. Manikhumar Gopalakrishna with nearly 3 decades of engineering experience, has a vision to establish and provide global standard of engineering expertise in heavy machinery infrastructure and bring latest technologies to our country with innovation & engineering excellence.

Mr. Visvanathan Raman - Chief Technical Officer

Mr. Visvanathan Raman, is a Graduate Mechanical Engineering from Madras University, Tamilnadu, India. He is a Member & Chartered Engineer in Institution of Engineers India. He is the Chief Technical Officer of Seematec Machinery Impex Pvt. Ltd. and he had been working with leading Engineering Organizations, Manufacturing Companies, Contracting firms, Educational Institutions etc., in India. During his Career he has visited more than 22 foreign countries for providing Technical knowhow machinery procurement. With more than 5 decades of rich national & international experience in the machinery procurement & consulting he carries immense knowledge of heavy engineering machineries in automotive, aviation, energy - wind and power, cement, locomotives and ship building.

He has a vision to serve the small to large level organizations with the vast knowledge and experience he has gained while working with large National & Multinational Organizations. He started his career with Simpson & Company as a planning engineer. In 1973, he got selected for training in Germany, through NPC (National Productivity Council) selection committee and got trained, at REFA institute Darmstadt, - practical training in Industrial Engineering at Mercedes Benz in Germany. He worked with the State Bank of India for 13 years in Project Evaluation providing advice to the bank on the technical feasibility in sanctioning loans. After a stint in banking & education, he rejuvenated his engineering passion in 1989 at Binny Engineering Company. He worked as project consultant with many heavy engineering enterprises; he is one of the authorised procurement agents in Larsen & Toubro for used heavy engineering machinery purchase. He now is integral part of SEEMA ENGINEERS, handling the technical & project management with a team of engineers. His profound knowledge and international exposure have helped Seema Engineers to build a substantial data base of machinery dealer network across the globe to help heavy engineering, upgrade themselves technologically.

Turnkey Heavy Engineering Machinery Manufacturing

Plan, Build, Manufacture

SEEMATEC - Seematec Machinery Impex Pvt. Ltd. thrives on its technical capabilities from SEEMA ENGINEERS built over last several years and strong will power, to provide value to customers. Perfecting past knowledge and recapitulating this expertise makes us perform better & faster in the field of heavy engineering. Collaborative engagement procreates innovation, which ultimately creates a better & sustainable future. This underlines that SEEMATEC pursuit of excellence is just a manifestation of achieving customer delight.

Over the last several years, SEEMA ENGINEERS has evolved as a prominent organisation from machinery trading to heavy engineering manufacturing . Recent technological development into heavy engineering has given SEEMATEC a edge in turnkey heavy engineering industry to exceed customer expectations and to unlock exciting opportunities towards lifting our own standards.

The Heavy Engineering industry has its own set of challenges due to the size of products involved and scale of operations. Our Customers expect the highest level of accuracy and reliability because of the huge cost involved.

The biggest challenge faced by the Heavy Engineering industry to reduce the product development cycle. This demands continuous development and up gradations of products to distinguish it from the competition and gain the first mover advantage in the competitive market.

SEEMATEC not only empowers its clients to achieve a competitive edge but also helps in increasing their market share with the help of their world-class Engineering Services and Solutions. We specialize in Engineering Design, Manufacturing, Product Design & Development, Value Engineering & Value Analysis, Engineering Analysis, and Automation Services. Our technical experts help us provide to you customized solutions which are essential to fulfill your requirements.

International Machinery Dealer & Manufacturer, Machinery and Parts & Spares dealers.

One stop solution for all your machinery and service needs

- ▶ **Turnkey projects** – Heavy Engineering Companies.
- ▶ **New & used machinery** – Importer/ buying/ selling
- ▶ **Installation/ Commissioning**
- ▶ **Service / Refurbishing / Retrofitting /**
- ▶ **Up gradation / O&M / AMC**
- ▶ **Chartered Engineer Certificate/ Certification**
- ▶ **Third party inspection services**
- ▶ **Shifting / Transport / logistics / Insurance**
- ▶ **Auctions / Liquidations & Appraiser**
- ▶ **Tools / spare parts supplier**
- ▶ **Technical man power supplier**
- ▶ **Material handling equipment**
- ▶ **Financing** – Industrial Land & Machinery
- ▶ **Start up company** - Industrial Land, shed & machinery requirement

The future of manufacturing- Industry 4.0

Seema Engineers and **Seematec** provide scalable solutions and strong ecosystem of partners allow our customers to migrate seamlessly across to **Industry 4.0**. The shift to smart manufacturing has brought in innovations in automation, robotics and the industrial internet of things (IIoT). Introducing artificial intelligence (AI), inter-operability and secure connectivity enables real-time monitoring, control and optimization of processes, resources and systems – all of which can lead to greater productivity, increased safety and reduced costs.

Selling your machinery at best prices

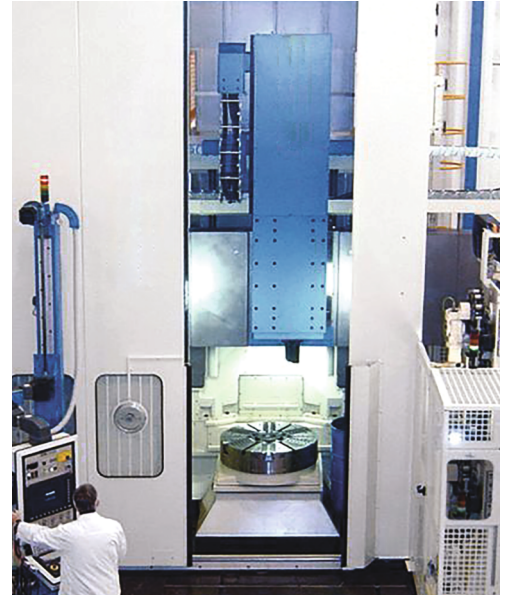

Seema Engineers is the leading seller of used metal machinery, CNC machinery, heavy engineering and CNC parts. We own everything we sell, so we are constantly on the hunt for more used equipment. We even buy non-working discontinued CNC machines for salvage. Whether you want to sell machine or an entire production line, make your first call. We are ready to make fair offers on used equipment every day of the year. Ready to liquidate your warehouse or production line? Give us a call!

Our technical services & turnkey consultancy

- ▶ Turnkey projects for machining & fabrication from advisory to installation
- ▶ Procure, Sales, service, spare parts assembling, installation, commissioning of projects
- ▶ Dealers of all type of machinery like Floor boring, Horizontal Boring, Lathe & Turning machines, Shearing equipment, Forging Equipments, Plano Millers
- ▶ All type of CNC machineries, machining centre , Milling machines, Drilling machines, Grinding Machines, Gear Machinery, power press. Injection Moulding machines, Die Casting Machines, Honing machines, Genset , Material Handling equipments and other allied Machineries.
- ▶ Refurbishment, retrofitting and modernisation of machine tools. Consulting engineering and retrofitting in the field of automation and robotics
- ▶ Supply of Technicians & Engineers on contract or permanent basis
- ▶ Chartered Engineers Certificates and certification
- ▶ Project Financing & commissioning assistance.
- ▶ Negotiations with sellers & freight forwarders.
- ▶ Transport and logistics solutions.

Why choose Seema Engineers ?

- We have extensive knowledge of the metalworking machinery and replacement parts
- We provide a qualified team for modernisation engineering with demonstrate ambition, commitment and quality.
- We provide accurate specifications along with digital pictures.
- We are experienced with importing from and exporting across the globe.
- We specialise in international CNC machinery sales & service.
- We help our customers as stop solution provider right from sourcing to installation.
- We employ highly professional, qualified programmers and engineers with technical experience and know – how in high end technology

For more than 25 years, we have been providing top-notch customer service for our metal heavy engineering industries. We asked our customers to leave honest reviews about our company. Here's what they had to say. " UNPARALLELED CUSTOMER SERVICE WITH A DEPTH OF EXPERIENCE " We've built our brand on this, and our staff has worked as a team to grow our company's top values. We value integrity, accountability, passion, community, and enjoyment. Our dedicated team is devoted not only to making our business succeed, but also to ensuring that your business succeeds through quality sales & service.

Larsen & Toubro Limited

B.Kannan, Deputy General Manager – Mechanical

Larsen & Toubro Limited, Engineering workshop, Kanchipuram

M/s Seema Engineers are having extensive knowledge and experience in sourcing second hand machinery. We recently sourced, a Second Hand column & Boom machine by M/S Seema Engineers is in excellent condition and working satisfactorily. We have done lot of CIR seem and Long seem welding for Wind mill towers and presently using the machine for pressure vessels jobs. Seema Engineers are reliable source for procurement of heavy second hand machines.

LARSEN & TOUBRO

NS Heavy Engineering

Mr. Uday Chary

We recently ordered USED EOT CRANE Make : Demag, Capacity : 200/ 100. When it comes to heavy engineering we trust Seema Engineers they have deeper knowledge and also provide and source the right kind of machinery. They have been our one stop source for all engineering machinery requirement.

HEAVY ENGINEERING

Howden Solyvent (India) Private Limited

Hosur, TamilNadu - 635 103, India

Customer Satisfaction Certificate

We assigned buying & sourcing of Skoda Machine Accessories - T slot bed for Blower Testing to Seema Engineers our experience was immensely delightful " Never expected such a good quality & rigidity bed & fully satisfied about product & service"
